

Farnborough Aerospace Consortium is a not-for-profit business-winning trade association. We are one of the longest established aerospace, defence & space trade bodies in the UK, providing support to our members. We act as a facilitator of business between large global primes and the supply chain in the South East & East of England. We are located in Farnborough – the home of UK Aerospace, in the South of England close to London.

We have a unique national and international membership of global primes, medium and small sized firms. We also have several world leading aviation research centres within our membership. FAC is a 'not for profit company' limited by guarantee – we are here to further the prosperity of our members – not ourselves. Our aim is to provide a low annual membership fee and a wide range of 'value added' services to members :

- Promote members' and regional sector interests nationally
- Facilitate member networking across industry peers and supply chains
- Link members with regional and national funding sources
- Are the focal point integrating industry, public sector and academic sector interests
- Provide strategic market insight
- Facilitates members presence at major trade shows and exhibitions
